

THE ILAE AND EPILEPSY 1909–2009

This exhibit is put together to illustrate some aspects of both the history of the ILAE and of the development of epilepsy in the years 1909–2009. This was the *ILAE century*, by the end of which the ILAE has become to be recognised as the leading professional organisation in epilepsy, with an impact on professional affairs, education, policy and research. The exhibition is based on the ILAE centenary history book (*International League Against Epilepsy 1909–2009: a centenary history*) which is on sale in the ILAE booth at the exhibition at a discount price for all congress delegates.

The exhibit was created by Simon Shorvon and Judit Jerney, and we would like to thank also Giselle Weiss and Soazig Daniel for their assistance. We are grateful also for the permissions to use the illustrations. The poster design and exhibition space was created by Clair and Curtis Inc, Budapest.
