EXECUTIVE BOARD 146th session Agenda item 11

EB146(8) 6 February 2020

Epilepsy

The Executive Board, having considered the report on epilepsy, 1 and noting the highly treatable nature of epilepsy, for which urgent action is needed; the many outstanding gaps in the prevention and treatment of the condition; its frequent occurrence as a comorbidity of neurological disorders; and the potential for scaling up implementation of synergistic, proven cost-effective measures to reduce the burden of epilepsy and other neurological disorders, decided:

- to note the global report, *Epilepsy: a public health imperative*, ² published in 2019; (1)
- to encourage Member States to discuss a possible draft resolution on further action on epilepsy and other neurological disorders for consideration by the Seventy-third World Health Assembly;
- (3) to request the Director-General:
 - to expand the scope of the report to be submitted for consideration by the Seventy-third World Health Assembly, by adding a new section entitled "Synergies in addressing the burden of epilepsy and other neurological disorders;"
 - (b) to develop technical guidance on strengthening country actions against epilepsy and its comorbidities, and make this available on WHO's website.

Ninth meeting, 6 February 2020 EB146/SR/9
