MESSAGES

Greetings!

On behalf of the Infantile Seizure Society, the Child Neurology Society, Philippines and the Philippine League Against Epilepsy Inc., we cordially invite you to the Joint 19th Infantile Seizure Society Annual Meeting "International Symposium on Status Epilepticus in Infants and Young Children" (ISSE2017) and 9th National Epilepsy Congress (9th NEC) of the Philippine League Against Epilepsy on July 17 – 19, 2017 at the Marco Polo Hotel, Cebu City, Philippines.

In keeping with the Infantile Seizure Society's tradition of choosing a theme of compelling importance for its annual international symposium, we have chosen Status Epilepticus in Infants and Children, indeed a theme of compelling importance because of the challenges in management and the associated significant morbidity and mortality. A wide range of topics from cellular mechanisms and pathophysiology to pharmacological agents being used, including the drugs under trial, will be discussed. It is but timely to re-visit our treatment guidelines for this condition especially when refractory to standard medical care, given the emergence of various anti-epileptic drugs and the advent of non-pharmacologic management like ketogenic diet. A special feature of this symposium will be a panel discussion on how we in the region manage status epilepticus in this young population. We have invited a powerhouse faculty composed of local and international epilepsy specialists and neuroscientists.

Back to back with the ISSE2017 is the two-day 9th National Epilepsy Congress of the Philippine League Against Epilepsy. The scientific program likewise offers a wealth of updates on highly relevant issues in epilepsy such as the neurobiology of AEDs, the ILAE classification of seizures and epilepsies, and adolescent issues in epilepsy including transition care. On the second day, the Asian Epilepsy Academy will run a whole day Video-EEG Course on the technical and clinical aspects of prolonged epilepsy monitoring.

This joint scientific engagement will be held at Marco Polo Hotel in Cebu City, Philippines. Regarded as the "Queen City of the South", Cebu City has a year-round tropical weather that allows you to experience all of the local sights, sounds, and tastes of the Philippines. And above all, a feast of Filipino hospitality will definitely make your visit truly memorable.

We look forward to seeing you in Cebu!!!
